PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience in MongoDB, Express.js, Angular, React, Node.js, and TypeScript, delivering scalable, cloud-based applications. Expertise in REST APIs, microservices, AWS, and Agile methodologies. Actively learning Generative AI, including LLM integration and prompt engineering.

TECHNICAL SKILLS

Languages	:	JavaScript (ES6+), TypeScript, Python, HTML5, CSS3
Frontend	:	Angular 6-20, Rxjs, Ngrx, Django React Js, Redux, Bootstrap, Material Ui,
Backend	:	Node.js, Express.js, Django
Architecture	:	Microservices, Micro Frontend (MFE), Lazy Loading, Monolithic Migration
Databases	:	MongoDB, RESTful API Design
Dev Tools	:	VS Code, Git, GitLab, Postman, Swagger API
Cloud/DevOps	:	Aws, GitHub, Netlify , Firbase, FileZilla, OnRender, Ftp Etc.

PROFESSIONAL EXPERIENCE

Bank of Montreal (BMO) **TCS (Client)–Diensten Tech Ltd. (Payroll) (15 Nov 2024 – Dec 2025)**

- Bank of Montreal (BMO) is one of Canada's leading multinational banks. This project was part of the Customer Connect platform, specifically Phase 2 – Account Arrangement, aimed at enhancing customer account management capabilities across BMO's digital banking systems.
- The service, named DC-AccArrCanClose, was already live in production. The primary objective of this phase was the adoption, enhancement, and migration of account arrangement services to support multi-account functionality, ensuring seamless integration with existing banking systems while maintaining high standards of security, performance, and reliability.
- Developed and maintained backend services using Node.js and TypeScript deployed on AWS infrastructure for BMO's core banking DC-AccArrCanClose service.
- Migrated account arrangement services to support multi-account functionality with seamless TIBCO integration, ensuring secure core banking operations for Canadian customers. •
- Built RESTful APIs with strict compliance to Canadian banking standards, internal BMO security and governance policies, and PCI-DSS requirements.
- Developed and maintained backend services using Node.js and TypeScript, deployed on AWS infrastructure.

GCON- (CONTRACT-MANGEMENTS-SYSTEM) **Viha Tech Pvt Ltd- (5 Feb 2024- June 2024)**

- GCON provides digital signature functionality, it does support of multiple signer from each party. GCON supports both sequential and parallel approval process. Administration can configure preference (sequential or parallel) through application setting
- Integrate Rest API based on the business requirements.
- Optimize front-end code for performance, ensuring fast load times and a smooth user experience.
- Utilize version control systems like Git for collaborative development.
- Implement responsive designs that guarantee a seamless experience across various browsers and devices.
- Integrate Rest APIs efficiently, aligning with business requirements and ensuring optimal performance.

MSM-UNIFY - QA-ACADEMY **Genxcellence Tech Pvt Ltd - (19 August 2022- 2 October 2023)**

- LMS Learning Management System (LMS) is a software application which handles all aspects of a learning process, including the administration, documentation, tracking, reporting, automation, and delivery of educational courses. MSM UNIFY Project like admin Students Managements System.
- Work as a Front end developer Role.
- Integrate Rest API based on the business requirements.
- Write clean, modular, and well-documented code to enhance maintainability.
- Optimize front-end code for performance, ensuring fast load times and a smooth user experience.
- Utilize version control systems like Git for collaborative development.
- Implement responsive designs that guarantee a seamless experience across various browsers and devices.
- Integrate Rest APIs efficiently, aligning with business requirements and ensuring optimal performance.

SITE-FORCE LAYRES **Rakuten as InnoEye Pvt Ltd - (Jan 2021- Aug 2022)**

- Worked on Layers Modules for Site Forces, integrating cutting-edge technologies such as 5G networks. Created robust functionalities to monitor and display site status within an autonomous networking system, ensuring seamless communication and operational efficiency.
- Work as a Front end developer Role.
- Work as Specialized in Micro Front End Architecture, enabling scalable and maintainable web applications..
- monolithic front-end systems into independently deployable modules. This approach improved development speed, allowed for team autonomy, and facilitated seamless integration of new technologies
- Integrate Rest API based on the business requirements.
- Utilize version control systems like Git for collaborative development.

EDUCATION

Oriental University Indore
B.Tech (Computer Science Engineering) ,(72.13 %) *July 2016 – Dec 2020*

KEY HIGHLIGHTS

- 4+ years of end-to-end full stack development across banking, EdTech, and telecom domains.
- Strong experience in enterprise Angular (v6–v20) with RxJS, NgRx, and lazy-loaded module architecture.
- Hands-on Node.js expertise with REST API design, TypeScript, and AWS cloud deployments.
- Active GenAI upskilling: building LLM-integrated Node.js services and RAG-based applications
- Proven ability to deliver in TCS/Agile environments for top-tier clients like Bank of Montreal (BMO).
